

VAIDIK DUBEY

Bhopal, M.P. | [+91-9174002626](tel:+91-9174002626) | vaidik26dubey@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

WORK EXPERIENCE

[Forma.ai](#) | Pune, Maharashtra

Customer Operations Analyst | Jan 2024 – Apr 2025

- Automated reporting workflows using **VBA/macros**, reducing manual effort by **80%** and execution time by **75%**.
- Built scalable reporting pipelines for high-volume business units, ensuring timely and accurate delivery.

TECHNICAL PROJECTS

[KisanDisha](#) – AI-powered market price intelligence for Indian farmers ([GitHub](#))

(Aug - Sept 2026)

- Engineered a full-stack **market-intelligence platform** (**Next.js, TypeScript, PostgreSQL, Prisma**) ingesting live government agricultural data across **7 Indian states** via an automated **AWS Lambda + EventBridge** pipeline with **exponential backoff** retry logic and **idempotent upserts**, validated by a **5-test automated suite (Vitest)**.
- Designed a **Gemini-powered tool-calling AI agent** with **6 custom function tools** that grounds every selling recommendation in real-time price, trend, and location data — eliminating hallucination by routing all reasoning through structured database queries.
- Implemented **Redis-backed caching and rate limiting (Upstash)** across all API endpoints, cutting average response latency from **300–650ms to under 1ms** on cache hits while protecting a fixed daily LLM quota from burst traffic.

[Tasko](#) – C++17 Task Scheduler with DSA Engine ([GitHub](#))

(Sept 2026)

- Built a **C++17 REST API** server from scratch - **max-heap** for **O(log n)** priority scheduling, **adjacency list + DFS cycle detection** for task dependencies, zero frameworks, raw **STL** throughout.
- Containerized with **Docker**, deployed on **Render**, consumed by a **Next.js/TypeScript** frontend with a **React Flow** dependency graph visualizer - C++ applied in a full-stack, deployed context.

[EduFlow](#) – Learning Management System ([GitHub](#))

(Jan - Jul 2026)

- Built a full-stack **Learning Management System** using **React, Express.js, PostgreSQL, Prisma ORM**, with **JWT authentication** and **role-based access control (RBAC)** across student, instructor, and admin roles.
- Designed and implemented **scalable REST APIs** for course management, enrolments, an **auto-grading quiz engine**, **payment processing**, and automated certificate generation.

[RepoLens](#) – RAG-Powered Codebase Exploration Tool ([GitHub](#))

(Aug 2026)

- Built a **RAG-powered codebase exploration tool** using **Next.js, TypeScript, Google Gemini AI**, and **Pinecone vector database** for **semantic search** across public GitHub repositories.
- Engineered a **repository-ingestion pipeline** - parsing, chunking, and generating **embeddings** for codebases - enabling **context-aware Q&A with source-code attribution**.

EDUCATION

SRM Institute of Science and Technology | Chennai, Tamil Nadu

B.Tech – Electronics and Communication | June 2024 | CGPA: 9.17/10

SKILLS

- Languages:** JavaScript, TypeScript, C++, SQL
- Frameworks:** React.js, Next.js, Node.js, Express.js
- Libraries:** Tailwind CSS, Zustand, GSAP
- Databases:** PostgreSQL, MongoDB, Prisma ORM, Mongoose, Pinecone (Vector DB), Redis
- AI/GenAI:** Google Gemini API, Function/Tool Calling, RAG (Retrieval-Augmented Generation), Embeddings, Semantic Search
- Cloud & Tools:** AWS (Lambda, EventBridge), Vercel, Supabase, Upstash, Git, GitHub, Docker, Postman, Vitest, Ubuntu
- Concepts:** Data Structures & Algorithms (DSA), REST APIs, OOPs, System Design, JWT, RBAC, Rate Limiting, Caching, OAuth

LANGUAGES

- Hindi (Native) • English (Fluent) • German (Basic)
